

## Kidscapism for Teachers – *Children reading and writing*

### Children Writing

Children write their own three-part stories, and work with other children in completing stories, using familiar word-processing-style tools.

### Children Reading

Children can read our online soap story, and add content, pictures, or complete tasks. Children can read their own stories, their schoolmates', and stories written by children from around the world.

### Children Working Together

Children can work with each other in writing stories, and you can link up with other schools around the world to create stories with a truly international flavour.

Kidscapism encourages creativity and excitement in your students by offering the opportunity for them to read, write and illustrate stories online.

### Children and ICT

Kidscapism encourages ICT literacy as well. Children have to navigate around the site, read material, use our editor, handle images - many of the skills which form part of the ICT curriculum.

### The Teacher's Role

Registered teachers have access to a unique classroom area - for up to 30 children. There is no need for children to log in. You have complete control over content publication. Children can follow up work at home.

### Security and Technical

We call you to confirm your identity. We do not run chatrooms or allow personal contact. There is no software to install. We have fully protected servers and software.

## Registration

Kidscapism costs £99 (or \$200) per school per year for an unlimited number of classes, teachers, and children. We need you to register with us so that we can verify your status, ensure we have your details correctly entered, and set you up for work. You will be able to have a good look round the facilities on the site before we take any money...

Please phone us on 0118 947 9628 or follow the links below.

*kidscapism is for children to read stories, create new stories, and to participate and collaborate with others*
